Comments from Trotsky - Inspiration, Insurrection, again, Hearing the Pure Sound of Spring Thunder Again, thank you.

Comments from Mao - Inspirational Ho-Chi Minh, called HoChi by the people.

Comments from Saroj Giri - poorest and aesthetic power together - I mean avant-garde again is here with the poorest against mafia power.

Comments from Ho-Chi Minh - all the people are in mass line - a lot of women are free love for Sirohi, but he claims they must educate themselves - all studying his Chinese, Japanese and Vietnamese Excellent Language and V-sign style - all against mafia prostitute nexus with cheap mall power of local nexus of capitalists and landlord regaining strength like the History and Totalisation of re-federalisation in our failure with my health - now I am healthy and following even Phenomenology of Mind as readable - especially love the fashion and style and even Ladder - clear to understand the crass language and the music of intellectuals to apply the mind for the poor.

Now Sirohi starts -

First - the Achillean lesson of dances by Ho-chi Minh - some type of Byzantine empire this Vietnam a lot of power feudal nexuses to in fact concrete empirical debt and slavery in history - in fact Sirohi adds an adjunct like Senegal of the Byzantium for prostitution and trade in women captives to Greece and Senegal - this is called trade links for women that is presently shifted to the other place - Thailand depicted in bad films I have seen recently - two in fact one about an American Gosling and another about A Danish Heavy trainer to marry and fuck - which is then Hanoi gang trade in history for slavery and women trade.

Psychonalaysis is pure education and correct clothing style all that.

Now develop Wei-Chi through this map - simply what is called Vietnamese two line attack on all power structures - forget empiricism and concrete teachers -all wrong - just generalize - which is how we see Sirohi being a teacher - generalize a detail if possible and that is this history -

The detail Byzantium is similar so adduced just say it and then generalize which then becomes what we call the general peasant movement of things which is then a pure speed ensemble - walking running and panting in class action, all liberating into insurrection in the port of Hanoi again lake port which has opium from trade in Indian poor trade which links it like Roman Gallagher book to that slave trade in modern times.

We insurrect that is all.

I mean pre-suppose consciousness like OP in Sirohi and insurrect.

Wei-Chi and our Technicolour.
